

# Project 1

Sourcing Sketch RNN model in ML.js to create overlaying map drawings.

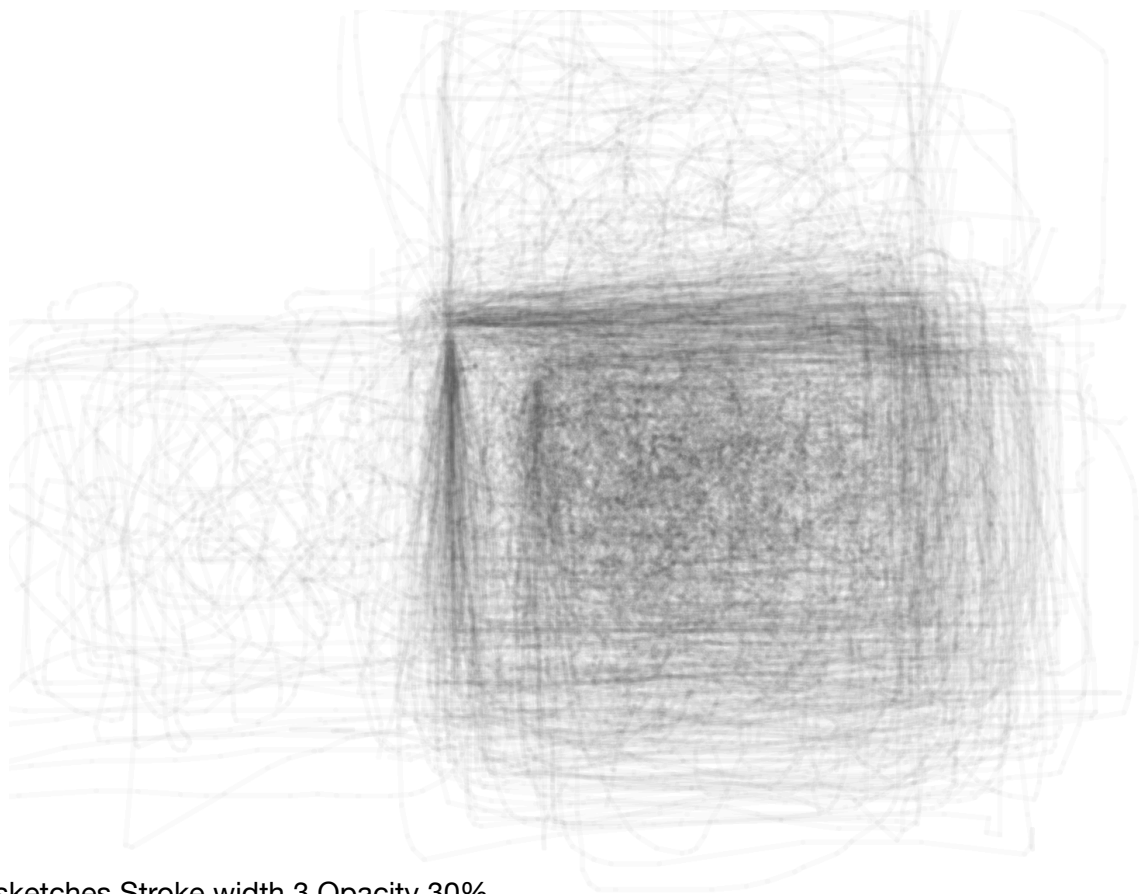

To show people at this time's idea of what a map is. It is rectangular and 2d. Maybe this common sense will change in the future.

In sketches, you can see a map of a nation, some simplified abstract version of the world, some random shapes etc.

226 sketches Stroke width 1 Opacity 50%

300 sketches Stroke width 3 Opacity 30%
